

University of North Carolina School of the Arts
Cost of Attendance Budgets for Financial Aid Purposes, 2025-2026
COLLEGE

These budgets have been calculated as an estimate of what it will cost a student to live and attend school for the 2025-2026 academic year. The "TOTAL" is more than what will be billed by the school, which depends on attendance and living arrangements. (For planning purposes, keep in mind that costs usually increase each year.)

Please note: Any student **requiring** UNCSA health insurance coverage may individually **request** the charge to be added to their Cost of Attendance budget through an appeal to the Office of Student Financial Aid. UNCSA health insurance charges are not included as a separate expense in the Cost of Attendance budget since the vast majority of college students have existing insurance coverage which allows them to "waive" the school plan.
